ArmorTech®

ArmorTech® Fungicides 

ArmorTech® CLT 825

A spray dry granule fungicide that offers curative and preventative protection against major turf and ornamental diseases. Superior formulation mixes thoroughly and stays in suspension. Contains 82.5% chlorothalonil.

ArmorTech® TM 462 F

A systemic fungicide with curative and preventative disease protection against many major turf diseases. A flowable formulation containing 46.2% thiophanate-methyl.

ArmorTech® CLT 720 FL

A liquid flowable fungicide that offers curative and preventative protection against major turf and ornamental diseases. Contains 54% chlorothalonil.

ArmorTech® TMI 2020 XL

Prevents and controls fungal diseases on turfgrass and ornamental plants. Contains iprodione and thiophanate methyl.

ArmorTech® IP 238

Provides extended disease control with contact and locally systemic modes of activity. Contains 23.8% iprodione.

ArmorTech® ZOXY® 2F

Broad spectrum azoxystrobin fungicide for control of a variety of turfgrass diseases. Priced attractively for fairways sprays. Contains 22.9% azoxystrobin.

ArmorTech® PPZ 143 MC

Broad-spectrum water based flowable fungicide containing 14.3% propiconazole. For disease control in both for cool and warm season turfgrass.

ArmorTech® ZOXY® PG

Broad spectrum granular fungicide combining 0.31% Azoxystrobin and 0.75% Propiconazole. Utilizes both root and leaf uptake to deliver preventative and curative control up to 28 days.

ArmorTech® Rotator

New formulation of active ingredient fluazinam gives golf course superintendents powerful disease protection while managing resistance. Offers excellent application flexibility as a rotational partner for chlorothalonil and used in combination with systematic fungicides.

ArmorTech® ZOXY®-T

A powerful combination of azoxystrobin and tebuconazole. The synergy created by two of the best golf fungicide technologies delivers broad-spectrum disease control for brown patch, dollar spot and soil-borne pathogens including Pythium.

ArmorTech® TEB 360 XL

ArmorTech® TEB 360 XL shows tremendous efficacy at low rates against a wide variety of turfgrass diseases. A 3.6 lbs/gal flowable formulation of tebuconazole.

ArmorTech® CYA 345

Prevents Pythium spore germination and protects from Pythium diseases for up to 28 days after application. Contains 34.5% cyazofamid.

GROUND SUPPORT FOR **BATTLE TESTED** TURF MANAGERS

ArmorTech provides plant protection (or *Armor*, if you will) and ground support to help turfgrass managers fight the various battles—dollar spot, crabgrass, environmental stress, budget constraints—with smart tools and innovative technologies (*that's the Tech*).

ArmorTech® Herbicides 

ArmorTech® KADE 4L

Liquid formulation offers season long pre-emergent control of over 30 grassy and broadleaf weeds. Contains 40.7% prodiamine.

ArmorTech® THREESOME®

A three-way selective broadleaf herbicide containing 2,4-D, dicamba and mecoprop-p. Used to selectively remove a wide variety of broadleaf weeds in golf, lawn care and sod farms.

ArmorTech® KADE 65 WDG

A water dispersible granular formulation of pre-emergent herbicide prodiamine. Broad spectrum control for annual grasses and broadleaf weeds in turfgrass and ornamental plantings.

ArmorTech® TRIONE XL

Provides Selective and Residual Control of Weeds in Ornamental Turfgrasses.

ArmorTech® SULF 396 XL

For use in Railroad, Highway, Roadside, Pipeline and Utility Rights of Way, Industrial Areas, Fence Rows, and Other Listed Non-Crop Sites.

ArmorTech® 3LO

A low-odor herbicide that controls clover, dandelion, henbit, plantains, wild onion, and many other broadleaf weeds. Contains 30.89% 2,4-D, 8.23% MCPA, and 2.77% dicamba.

COMING THIS FALL OF 2023

ArmorTech® 4-Runner

4 Active Ingredients from 4 Different Chemical Families

ArmorTech® 4-Runner is a premium four-way herbicide for efficient, cost-effective control of sedges and broadleaf weeds.

ArmorTech® PAC 223

A systemic plant growth regulator that slows vegetative growth by inhibiting gibberellin biosynthesis. Improves overall quality of turfgrass, suppresses *Poa annua* in bentgrass and perennial ryegrass greens, fairways and tees. Slows grass growth mowings and clippings for up to 2 months. Contains 22.3% paclobutrazol.

ArmorTech® PGR 113 MC

A water-based microemulsion concentrate used to manage growth and improve quality and stress tolerance of warm- and cool-season turfgrasses. Can be used to help reduce line trimming frequency (space) around obstacles such as trees, cart paths and hazards. Contains 11.3% trinexapac-ethyl.

ArmorTech® Fertilizers

ArmorTech® 45 SR

ArmorTech® 45 SR is a highly-concentrated liquid fertilizer derived from Slow Release Urea and Phosphite.

ArmorTech® 28 + Si

ArmorTech® 28 + Si is a buffered potassium phosphite product that also contains potassium silicate. Potassium silicate is known to strengthen plant cell walls.

OPTIMIZER®

Optimizer® Green Shade

A green pigment spray additive that improves turf appearance while serving as a spray pattern indicator. Optimizer® may be tank mixed with fungicides, herbicides, insecticides and wetting agents.

Optimizer® Sweet Iron®

Optimizer® Sweet Iron® yields outstanding residual color, increased nutrient uptake, and improved overall plant health through a water soluble form of Iron with a Complex Natural Polysaccharide (Sugar), which allows turfgrass plants to acquire Iron through both foliar and root absorption.

AMERICAN
OWNED AND OPERATED
★ COMPANY ★

ArmorTech® is an **American owned and operated** brand that represents quality products from a trusted source. We help professional turfgrass managers achieve high performance turf at an equitable value. Investment in our **ArmorTech®** and **Optimizer®** brands supports independent businesses committed to the US Turf and Ornamental industry.
